

KENTUCKY'S ELECTRIC BICYCLE LAW FOR THE ROAD

- » In Kentucky, an electric bicycle is defined as “bicycle,” so long as the electric bicycle has operable pedals and can be operated under combined human and motor power. The same rules of the road apply to both electric bicycles and human-powered bicycles.
- » Electric bicycle are not subject to the registration, licensing or insurance requirements that apply to motor vehicles.

- » Helmets are not required and there is no age minimum for electric bicycle use. Electric bicycles are allowed on sidewalks and bike paths.

*The following Kentucky laws are referenced: Ky Admin. Reg. 601 § 14-020(1)(a).

eMTB GUIDELINES

- » On federal, state, country and local trails, electric mountain bike (eMTB) access varies significantly.
- » Generally, any natural surface trail that is designated as open to both motorized and non-motorized uses is also open to eMTBs.
- » eMTBs may not be allowed on trails managed for non-motorized activities.
- » Do not ride your eMTB in areas where the local rules are unclear. Ride legally and only on authorized trails to show that mountain bikers are responsible trail users.
- » When in doubt, ask your local land manager about access to specific trails. Local land rules change frequently.

KENTUCKY'S ELECTRIC BICYCLE LAW FOR TRAILS

- » LOCAL: Consult your local land management agency.
- » STATE: The Kentucky Department of Local Government State Parks does not currently have an eMTB policy. Contact the department for the most up to date information. PeopleForBikes is monitoring this policy and will update this document as needed.
- » FEDERAL: On federal lands, eMTBs are considered motorized vehicles and have access to motorized trails. Contact the U.S. Forest Service Southern Regional Office, the Big South Fork National River and Recreation Area, Mammoth Cave National Park, or the Tennessee Valley Authority for more information.

GREAT eMTB RIDES IN KENTUCKY

- » Redbird Crest Trail System
Manchester | 100 miles
- » Sheltowee Trace Sections
Arvel | 31 miles

With an electric bicycle, bicyclists can ride more often, farther, and for more trips.

Electric bicycles are designed to be as safe as traditional bicycles, do not compromise consumer safety, and benefit bicyclists who may be discouraged from riding a traditional bicycle due to limited physical fitness, age, disability or convenience.

In many states, electric bicycles are regulated under antiquated laws primarily aimed at combustion engine vehicles such as mopeds or scooters. PeopleForBikes is clarifying state laws governing the use of electric bicycles in the U.S. Every state's law is different, but the objective is to ensure that low-speed electric bicycles are regulated similarly to traditional, human-powered bicycles.
